

Judith Neve

Education

- 2021—2023 **Methodology and Statistics for the Behavioural, Biomedical, and Social Sciences Msc**, *Utrecht University*, Utrecht, Netherlands
 Running GPA: 8.3/10.
 Applied Data Science track, covering exploratory analysis, data visualisation, supervised and unsupervised learning, regularisation, deep learning and natural language processing.
Thesis project: Evaluating tuning strategies for random forest hyperparameters with regards to prediction performance of clinical prediction models and computational time.
 ○ [GitHub repository](#).
 ○ Aim: identify tuning strategies improving predictive performance of machine learning models and reducing computational time.
 ○ Gained in-depth understanding of random forests.
 ○ Designed a three-part simulation study.
 ○ Ran and interpreted preliminary results.
 ○ Optimised scripts for running on a computer cluster.
 ○ Currently visualising data obtained from the simulation.
 ○ Currently writing up results.
- 2017—2021 **Psychology and Statistics Bsc (Hons)**, *University of Glasgow*, Glasgow, United Kingdom
 Obtained with Honours of the First Class (highest distinction).
Dissertation project: The evolution of data sharing practices in the psychological literature.
 ○ [Preprint](#) (accepted for publication in Meta-Psychology).
 ○ [Open Science Framework project](#).
 ○ Aim: extend findings from two articles investigating journal policies' impact on data sharing rates.
 ○ Reused data and cleaned it, collected follow-up data, and modelled the effect of time and other variables on data sharing rates using generalised additive models.

Work experience

- Nov.—Dec. 2022 **Teaching Assistant**, *Department of Psychology, Utrecht University*, Utrecht, Netherlands
 and
 Nov.—Dec. 2021
 ○ **Skills developed:** Communication of statistical concepts, leadership, organisation, time management, integrating feedback.
 ○ Led weekly (2022) or fortnightly (2021) tutorial sessions for three groups of 20 second-year undergraduate psychology students. The tutorials focused on understanding and applying statistical methods and critically assessing a published research article.
 ○ Reviewed homework prior to each tutorial sessions and modified the teaching materials accordingly to focus on identified difficulties.
 ○ Was given very positive reviews by students.
- May—Aug. 2022 **Teaching Assistant**, *Department of Methodology and Statistics, Utrecht University*, Utrecht, Netherlands
 ○ **Skills developed:** Communication of statistical concepts, teamwork, organisation, attention to detail.
 ○ Updated and created online statistics lessons for second-year psychology students.
 - Focused on multiple linear regression (Frequentist and Bayesian), ANCOVA (Frequentist and Bayesian), and mediation (Frequentist).
 - Each lesson explains the concept, prompts the student to conduct an analysis in JASP, and guides through interpretation of the output.
 - Concept explanations were modified to include more detail.
 - Analysis was switched from SPSS to JASP.
 - Interpretations of analysis results were re-written entirely.

- Oct. 2021—**Research Assistant**, *Department of Methodology and Statistics, Utrecht University, Utrecht*,
Apr. 2022 Netherlands
- **Skills developed:** R package building, attention to detail, teamwork, communication.
 - Conducted extensive testing of the R package CTmeta:
 - Tested input and output for each function.
 - Checked the clarity and accuracy of the documentation. Where necessary, modified the documentation.
 - Where necessary, modified functions to improve the quality of the output.
- Oct. 2021 **Teaching Assistant**, *Department of Information and Computing Science, Utrecht University*,
Utrecht, Netherlands
- Skills developed:** Critical thinking.
- Identified documents relevant to each element of a list of 150 statistical queries.
- June—Dec. 2020 **Research internship under the supervision of Dr. Zsolt Péter Szabó**, *At Work Kft.*,
Budapest, Hungary
- **Skills developed:** Communication of statistical results, psychometric test validation, exploratory data analysis.
 - Conducted exploratory and confirmatory factor analyses on a Hungarian translation of the Short Dark Triad questionnaire for validation of the questionnaire.
 - Third author on the [resulting publication](#).
- June—Aug. 2019 **Voluntary research work under the supervision of Dr. Emily Nordmann**, *Department of Psychology, University of Glasgow*, Glasgow, United Kingdom
- **Skills developed:** Communication, critical thinking, text mining basics, exploratory data analyses, data cleaning.
 - Cleaned and led exploratory analyses on a language use dataset collected prior.
 - Conducted a literature search and wrote a literature review.
- June 2018 **Field investigator**, *MC2, Prével*, France
- **Skills developed:** Communication, time management, attention to detail.
 - Collected responses to a questionnaire in a restaurant.

IT skills

R, *proficient*

Experience: 6 years.

- Familiar with base R and tidyverse.
- Data wrangling, visualization, and analysis.
- Writing functions.
- Data simulation.
- Reproducible reports in R Markdown.

LaTeX, *proficient*

Experience: 3 years.

- Creation of documents.
- Beamer.
- Personalisation of templates.

Python, *intermediate*

Experience: 1 year.

- Data analysis.
- Manipulation of variables and dictionaries.
- Writing simple functions.

SQL, *beginner*

- Currently taking a course.

GitHub, *intermediate*

Experience: 2 years.

- Collaboration on projects using forks or the same repository.
- Version control.
- GitHub pages.

JASP, SPSS, *intermediate*

Experience: 6 months.

- Fitting models

Mplus, *intermediate*

Experience: 3 months.

- Data analysis.
- Fitting various structural equation models.
- Interpretation of output.

slurm, *beginner*

Experience: 3 months.

- Running large batches of R scripts on a cluster.

Languages

French, C2

English, C2

Hungarian, C1

Prizes and awards

- 2021 **Distinguished first class Honours**, *University of Glasgow*, United Kingdom
Among the 25% highest performing first class honours students in Psychology.
- 2021 **Research Methods prize**, *University of Glasgow*, United Kingdom
Best final year project in research methods.
- 2020 **SAS prize with high distinction**, *University of Glasgow*, United Kingdom
Best final year project on Bsc Psychology and Statistics.
- 2020 **Merit list Psychology level 3**, *University of Glasgow*, United Kingdom
Figuring on the list of psychology students obtaining an A grade in academic year 2019/2020.
- 2018 **Merit list Psychology level 1**, *University of Glasgow*, United Kingdom
Figuring on the list of psychology students obtaining an A grade in academic year 2017/2018.

Extracurriculars

- 2020—2021 **Vice President Treasurer**, *Glasgow University LGBTQ+ Society*
- **Skills developed:** Leadership, teamwork, teambuilding, communication, organisation.
 - Part of the executive in one of the largest Scottish student societies.
 - Worked with the President and Vice President Secretary to chair the 18-people committee.
 - Managed society finances.
 - Collaborated with other societies.
- 2019—2020 **International Officer**, *Glasgow University LGBTQ+ Society*
- **Skills developed:** Teamwork, communication, organisation.
 - Worked in a group to ensure the smooth running of the society.
 - Organized international student-oriented events.
 - Contact point with culture and language societies.
 - Contact point between international students and the committee.
